

FUTURE WATTS

GENERATE YOUR OWN ELECTRICITY

Free Site Inspection, Free Advice, Free Project Report

BENEFITS :-

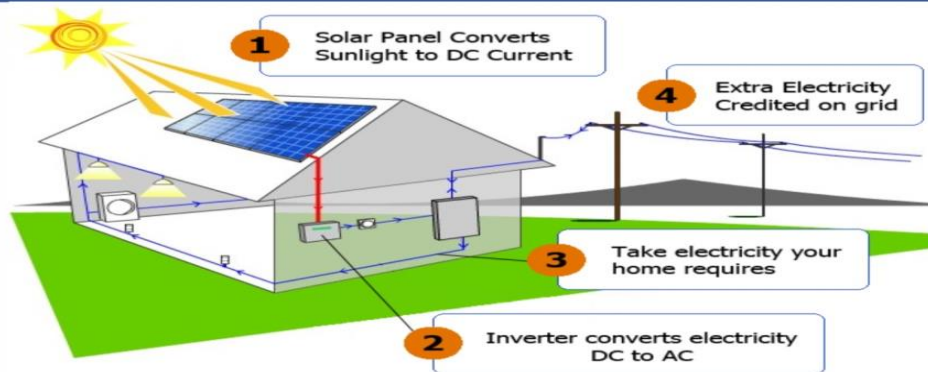

- Saving in Electricity Bills
- One Time Capital Investment
- Economically Viable
- Fast to Install
- Low Maintenance
- Long Life
- Hassel Free Documentation
- Get Deprecation Benefits in Tax Saving

WHY US:-

- 7 Years of Experience in Solar Field
- Dedicated Team of Experts
- Using Quality Bom of Tire 1 Companies only.
- Lots of Projects Completed
- Fast Installation
- Quick after Sales Service

WHAT IS NET METERING:-

Net metering allows residential and commercial customers who generate their own electricity from solar power to feed electricity they do not use back into the grid. For example, if a residential customer has a PV system on the home's rooftop, it may generate more electricity than the home uses during daylight hours. If the home is net-metered, the electricity meter will run backwards to provide a credit against what electricity is consumed at night or other periods where the home's electricity use exceeds the system's output.

RETURN ON INVESTMENT

- For industries and Commercial Buildings ROI not more than 5.5 years
